

Complete this form only if you have completed an advanced safe food handling course and possess a valid certificate. Owners and Managers must be certified in safe food handling. If you took a certification course other than the National Restaurant Association's ServSafe, please contact us so that we may verify the program's credentials prior to the issuance of the card.

Bring the completed form, your valid certificate, and valid photo ID to our office. The expiration date on your County Food Manager's Card will correspond to the expiration date of your certification.

If your certification has expired, the Cape Girardeau County Public Health Center will begin presenting the 16 hour ServSafe course in the near future. This course may also be taken online, but ServSafe requires that the test be administered by a proctor. If you would like to have an exam proctored, please contact us.
